Service Line Inventory Form

Submit Online to the Drinking Water Portal as Excel file: wqcdcompliance.com/login

LCRR - Lead Service Line Inventory Details

Section I: Public Water System Information

PWSID:	CO0130020	System Name:	Consolidated Mutual Water Company		
Contact Person:	Steven Glenn	Phone:	720-417-5023	Email:	sglenn@cmwc.net

*System Authorized Signature | Printed Name | Date:

*Signature not required if submitted online.

Section II: Non-Lead Service Line Inventory Summary Information - REQUIRED FOR ALL SYSTEMS

Enter the Total Number of Service Lines within the Distribution System:	22460
Enter the Total Number of Service Lines that are Known to be Non-Lead:	21386

Describe below ALL of the methods used to make the non-lead service line material determination:

Describe below ALL of the methods used to make the non-lead service line material determination: Tap records were reviewed first. The information provided in the tap records includes the date of original tap, any changeovers to new mains, material classifaction of the service line from the water main to the curb stop or meter, and in some cases purchase reciepts of the

Section III: Service Line Inventory Site Information for Lead, Galvanized Requiring Replacement, and Lead Status Unknown - NOT REQUIRED IF SYSTEM IS ALL NON-LEAD

Information on each Lead, Galvanized Requiring Replacement, and Lead Status Unknown Service Lines must be entered below.
Use Drop-downs where available. Based on the service line information input below, the form calculates the material classification of each full service line.

Service Line Material Classification	Definition	CALCULATED Total Number of Service Lines	CALCULATED Additional Information Based on Form Inputs
Lead	Any portion of the service line is known to be made of lead (NOT including lead connectors).	0	Form is complete - No Additional Information is Required, Submit Form to Portal in Excel Format
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0	
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	1074	The System is required to develop and submit a Lead Service Line Replacement Plan by October 16, 2024
Non-Lead (Not Required to be Reported Below)	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	21386	

Service Line Information									Sample Pool Information (Required for Sample Pool Sites, Optional Otherwise)						Optional Additional Fields for Service Line Information (e.g. Service Line Diameter, Install Date, etc.)		
Unique Service Line Identifier	Location Identifier or Site Address	Line Ownership	Service Line Material Main to Meter	If non lead in column D, was material ever lead?	Service Line Material Meter to Structure	Verification Method for Service line material main to meter	Verification Method for Service line material meter to structure	CALCULATED Service Line Material in Inventory	Is there a lead gooseneck, pigtail, or connector present?	Building Type	Is a Point-of-Use or Point-of-Entry Device Present?	Does the Interior Building Plumbing Contain Copper Pipe with Lead Solder from before 1988?	Current Lead and Copper Sample Pool Site?	CALCULATED Site Tier Level (If Community)	Data Field 1: [ENTER FIELD NAME HERE]	Data Field 2: [ENTER FIELD NAME HERE]	Data Field 3: [ENTER FIELD NAME HERE]
